Profile overview

He advises companies on identifying, assessing, hiring and developing executive leaders, with a special focus on PE-backed and other fast-moving manufacturing, transportation, infrastructure, energy, and natural resources sectors.

JP works with organizations looking to attract highly transformative leaders to take on critical mandates across general management, operations, supply chain, manufacturing, technology, transformation and growth. With more than 25 years of experience across executive search, leadership advisory, operations and technology transformation and deals leadership in industrial environments, he brings a practical, business-led perspective to our broad base of industrial clients' leadership challenges.
